

The Sun and Water Cycle

Picture Vocabulary

5.E 7.1 and 7.2 The Sun and Water Cycle

Ocean

The entire body of saltwater that covers about 71% of Earth

Fresh Water

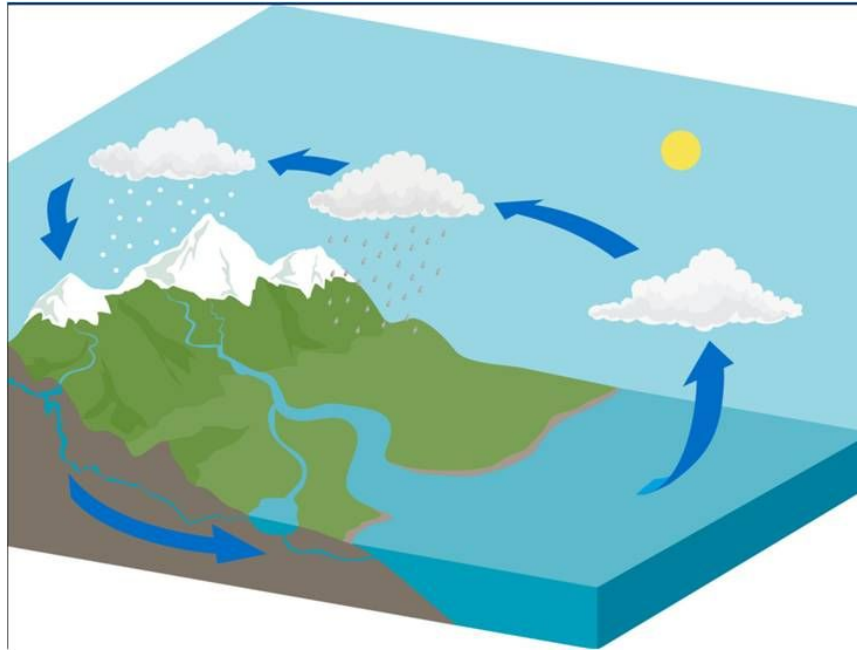

Water found in rivers, lakes, glaciers, ice sheets, and underground that contains low concentrations of salt

Salt Water

Water found in oceans (and few lakes) that contains 3-4% salt

Water Cycle

The constant movement of water through the land, air, oceans, and living things

Evaporation

The changing of water from liquid to
a gas

Condensation

Physical change in matter from a
gas to a liquid

Precipitation

Rain, snow, sleet, and hail that falls from clouds in the sky

Accumulation

A buildup or gathering of something
that occurs over time

Runoff

The movement of water on a surface to areas of lower elevation
