- A. Climate
- B. Weather
- C. Latitude
- D. Elevation

## II. Identification

Use the words to fill in the blanks.

climate      wind      air      hurricane      land      ocean      water

Coastal areas in Florida have a humid \_\_\_\_\_ because there is a lot of moisture in the \_\_\_\_\_ all year round. This moisture comes from the \_\_\_\_\_. There is also usually a lot of moving air, or \_\_\_\_\_, in these cities as well. Even in the wintertime, the Sun's energy heats the \_\_\_\_\_ faster than the \_\_\_\_\_ nearby. Sometimes natural disasters can occur, such as a \_\_\_\_\_, which is a tropical system that has heavy rains and high winds.
